## PROFESSIONAL SUMMARY

---

Dedicated and highly skilled Javascript developer with a proven track record of building efficient web application with a deep understanding of front-end and back-end development. I excel at creating dynamic user friendly and responsible website. My expertise proficiency in modern Javascript frameworks such as React, as well as experience in Node js for server side development. I am passionate about staying up-to-date in the latest web development trends and technologies to ensure the highest level of quality and performance. Strong problem solving abilities, a keen eye for details and a commitment to a writing clean, maintainable code are the corner stone of my development approach. I am an effective communicator and elaborator, capable of working within agile teams to achieve project goals efficiently. Seeking to contribute my technical expertise and passion for innovation to drive web development project to new height.

## SKILLS

---

- ❖ Proficient in HTML5, CSS3, JavaScript (ES6+)
